About Vested Impact's Methodology

Vested Impact's data quantifies holistic external material value creation and impact of companies. It details the positive, negative and secondary impacts a company has on the environment, health of people, society and over 169 sustainable development goal targets. The data is produced by Vested Impact's Impact Methodology, which is a mathematical model of the impact of individual company activities against the 169 United Nations Sustainable Development Goal targets, across each country, and produces continuously updated estimates of the net impact of companies by means of an information integration algorithm. The data is primarily sourced from open databases published by the World Bank, United Nations, IMF, WHO, OECD, IPCC, and EuroStat. Other sources of data regarding companies and their activities; include Financial Modelling Prep and Africa Markets.

Impact Summary

Portfolio Impact Overview

According to Vested Impact, which measures holistic external value creation and impact of companies products and services;

CIRCA5000 Health and Wellbeing UCITS ETF has an overall impact rating of 28, indicating an overall medium positive impact portfolio

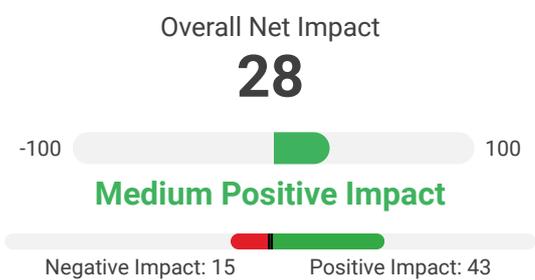

CIRCA5000 Health and Wellbeing UCITS ETF has a direct positive impact on 13 United Nations Sustainable Development Goals; including Education, Gender, Health

CIRCA5000 Health and Wellbeing UCITS ETF has a direct negative impact on 6 United Nations Sustainable Development Goals; including Climate, Oceans, Water

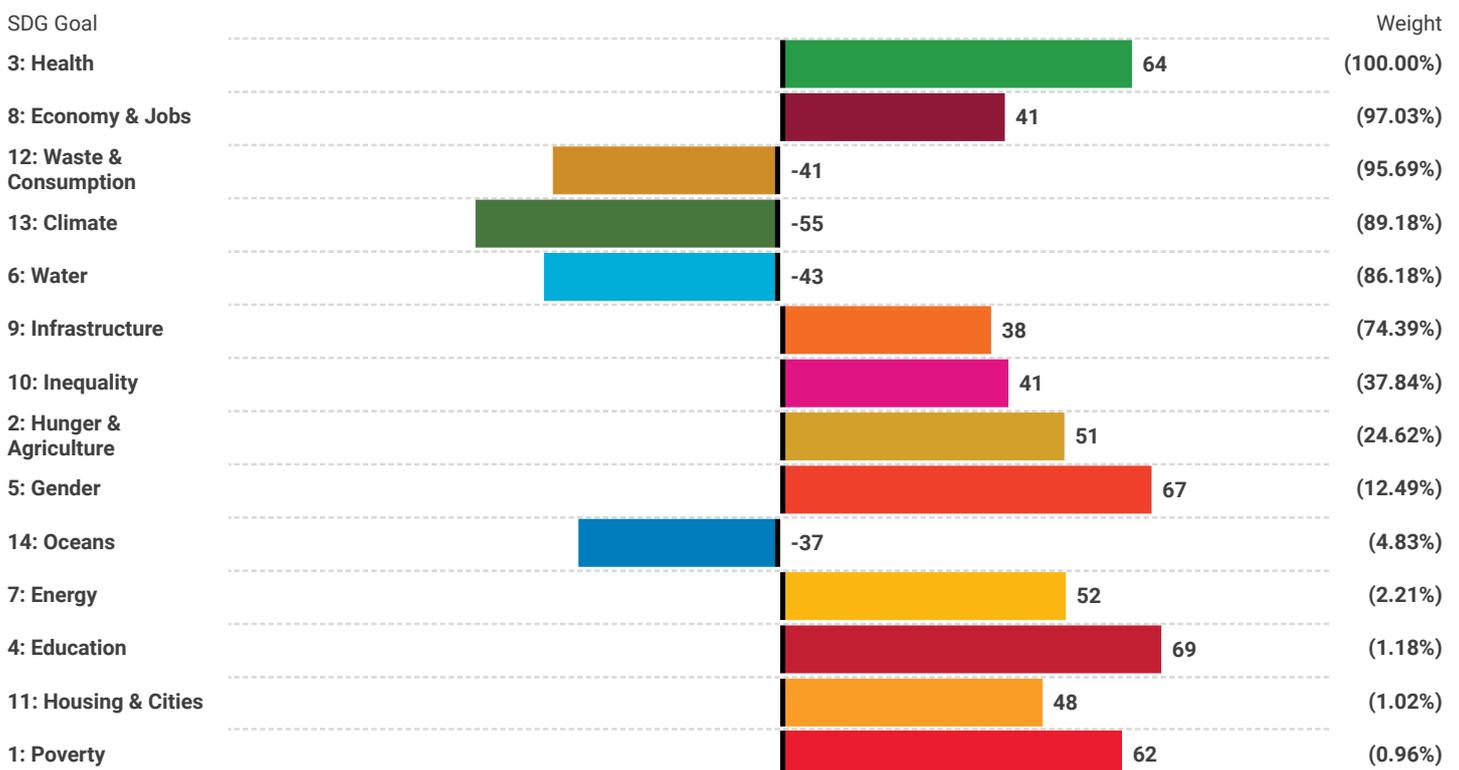

Overall Impact

SDG Impact Summary

The Sustainable Development Goals are the blueprint to achieve a better and more sustainable future for all. They address the global challenges we face, including poverty, inequality, climate change, environmental degradation, peace and justice. This agenda consists of 17 sustainable development goals (SDGs) and 169 targets that are in need of solutions that the private sector can deliver. The following graph details the aggregated net impact of the portfolio against each measured SDG goal, with the total weight of portfolio holdings with an impact on at least 1 underlying SDG Target within the SDG Goal.

Holdings Overall Impact Ratings

The tables below contain the holdings within the portfolio with the highest net impact, and the lowest net impact. The full list and score of 75/75 underlying holdings are included at the end of this report

To detail of each holding's impact can be accessed in its individual Asset Impact Report.

Highest 5 overall impact companies

Menicon Co., Ltd.	63 (Weight 0.91%)
Molina Healthcare, Inc.	56 (Weight 1.37%)
Benesse Holdings, Inc.	54 (Weight 1.18%)
AMN Healthcare Services, Inc.	52 (Weight 1.20%)
Chemed Corporation	51 (Weight 1.16%)

Lowest 5 overall impact companies

Axsome Therapeutics, Inc.	15 (Weight 0.90%)
ANI Pharmaceuticals, Inc.	14 (Weight 1.03%)
Corcept Therapeutics Incorporated	14 (Weight 0.96%)
Liquidia Corporation	14 (Weight 0.89%)
Artivion, Inc.	8 (Weight 1.06%)

Impact Pillars

Vested's impact methodology assesses impact leveraging 4 key Impact Pillars, that are applied across each and every SDG Target a holding company's underlying activities contribute to, in each market; positively or negatively. The following sections of this report show the details of this data. The algorithm pulls on over 100,000,000 data points from over 250 organisations to validate the impact across each metric and a list of the underlying data applied to assess and quantify impact is included at the end of this report.

Vested's Impact Pillars are the basis of the methodology; intended to assess if a company is serving the right people, in regards to the social or environmental issues that are most important/needed to those people, with a solution/services that delivers value, and how much change are they creating; in line with their own growth. There are over 122 calculation points underpinning the pillars. Below is the average ratings for the portfolio, based on the weighted aggregation of the underlying holdings ratings.

People

The extent of impact on most in-need populations and geographic areas

Impact Score

32 / 100

A MEDIUM score suggests that the activities of the portfolio companies primarily affect people who have a significant need for solutions related to the relevant SDG targets. To increase their impact, the relevant portfolio companies should consider expanding their activities to markets and customers with a higher need for such solutions.

Country Score		(37)
Status Score		(24)
Trend Score		(20)

Importance

The importance of the impact area/s the portfolio companies' impact

Impact Score

80 / 100

A VERY HIGH score indicates that the underlying activities of the portfolio holdings are addressing the social needs that are deemed of the most importance within the relevant geographic market and as expressed by the consumers/customers.

Global Importance Score		(43)
Societal Importance Score		(67)
Supporting Score		(50)

Value

The amount of value the portfolio companies' activities deliver towards the impact area/s

Impact Score

29 / 100

A MEDIUM score indicates that the activities of the portfolio companies have a significant contribution to progressing the social issues they are impacting; taking into account the depth of impact, how immediate the impacts are felt, and long-term sustainability of the impacts.

Depth Score		(36)
Immediacy Score		(89)
Irremediability Score		(29)
Sustained Impact Score		(72)

Effect

The scale at which the portfolios companies' contribute to overall change

Impact Score

66 / 100

A HIGH score indicates that the portfolio holdings have a large and significant overall effect on the social issues and/or their business growth of the holdings are aligned with impact change.

Scale Score		(77)
Change Score		(44)

To view the methodology and definitions of each factor, please refer to the Vested Impact Methodology contained in the appendix to this report, or available [online](#).

SDG Analysis

A company's impact on global challenges can take various forms, either positive or negative, both directly and indirectly, whether intended or unintended. The data presented below highlights the specific global challenges affected by the activities of the portfolio companies in the markets they serve. To determine the overall impact on each Sustainable Development Goal (SDG) target, we apply the four impact pillars to every business activity within each underlying portfolio company that relates to the SDG target in each respective country. These individual scores are then averaged to produce the final overall rating for the SDG target.

The following list outlines the SDG targets influenced by the portfolio companies. The weight of each SDG Goal and SDG Target is the total weight of portfolio holdings with an impact on at least 1 underlying SDG Target within the SDG Goal.

3: Ensure healthy lives and promote well-being for all at all ages

3.4: Reduce mortality from non-communicable diseases and promote mental health and well-being

Top 5 holdings that impact the SDG target

Most significant negative impact

Asset	Weight	Impact
BeiGene, Ltd.	1.13%	-59

Most significant positive impact

Asset	Weight	Impact
Encompass Health Corporation	1.61%	83
Moderna, Inc.	2.16%	79
Integer Holdings Corporation	1.19%	76
Novo Nordisk A/S	4.78%	75
Chugai Pharmaceutical Co., Ltd.	1.29%	74

3.2: End preventable deaths of children under 5 years of age

Geographic Analysis

Different geographic regions and territories have vastly different needs and challenges, thus companies in different geographies can have significantly different impacts on addressing the sustainable development goals; relative to how in need and how important progressing certain sustainable development goals are for the customers and recipients in those respective geographies.

The below scores are not solely reflective of weighted revenue generation in each geography, but rather the assessment of the degree of impact experienced in each geography by the relevant portfolio companies. An SDG can be both positively and negatively impacted within a region, as is reflected as such.

Industry Analysis

Different industries can have vastly different impacts on addressing the Sustainable Development Goals, depending on the companies underlying activities, products and services delivered and how directly they address solving the related SDGs, and the immediacy and long-term effects of the products and services.

The below scores are not solely reflective of the weighted revenue generation of each industry within the portfolio, but rather the assessment of the degree of impact generated from the underlying activities of companies within the portfolio.

Biotechnology  Weight: 27.46%

Portfolio Holdings Table

The following table gives a breakdown of the overall and net impacts of the portfolio holdings utilized in this portfolio assessment and report. All efforts have been made to ensure as comprehensive coverage as possible, and the table below details only the holdings for which Vested Impact could adequately provide impact assessment.

Some assets, such as cash, are out of scope for analysis and are removed from a fund's holdings prior to assessment. If the portfolio weightings are not known or provided, then equal distribution of any unweighted portfolio value occurs across the unweighted holdings.

Where the data on human lives is not available, a value of "-" is provided - this does not imply that the holding does not impact human lives, but rather insufficient data is available to make an adequate calculation.

Asset	Weighting (%)	Negative Impact	Positive Impact	Net Impact	Impacted Lives
AstraZeneca PLC	5.19	-18	38	20	6043833
