➤ What is this product?

Type: This product is a UCITS fund.

Term: No fixed term.

Objectives: The investment objective of the Fund is to provide exposure to companies that are finding sustainable solutions to reduce the strain placed on natural resources by human consumption. In order to achieve its investment objective, the Fund will generally seek to replicate the net total return performance of the BITA CIRCA5000 Clean Water & Waste Impact Index (the "Index"), subject to the deduction of the TER and other expenses associated with operating the Fund as further described in the "Fees and Expenses" section of the Prospectus.

The Index is a rules-based index that tracks the market performance of a basket of global publicly listed companies aligned to the investment objective of the Fund. By replicating the Index, the Fund will invest primarily in a portfolio of equity securities that, as far as practicable, comprise the component securities of the Index in similar proportions to their weightings in the Index.

The Fund may have exposure to or invest directly up to 20% of its Net Asset Value in shares issued by the same body, which limit may be raised to 35% for a single issuer in exceptional market conditions, including (but not limited to) circumstances in which such issuer occupies a dominant market position.

Where it is not possible or practicable for the Fund to invest directly in or continue to hold all of the component securities of the Index (for reasons such as, but not limited to, where this would involve difficulties or substantial costs, where one or more securities in the Index becomes temporarily illiquid or unavailable, or as a result of legal restrictions or regulatory limitations that apply to the Fund but not the Index) and/or where consistent with its investment objective, the Fund may also invest in Depositary Receipts.

The Fund may also engage in transactions in financial derivative instruments ("FDIs") for hedging and/or efficient portfolio management purposes. The Investment Manager intends to hedge foreign exchange risk of some of the classes that are denominated in a currency other than the base currency. The Fund may use the following FDIs: options and futures transactions, forward contracts, non-deliverable forwards and spot foreign exchange transactions. The equity securities and FDI investments of the Fund will be listed, traded and dealt with on one or more of the Regulated Markets set out in the Fund's Prospectus.

The Fund is an Article 9 fund for the purpose of the Sustainable Finance Disclosure Regulation.

The base currency of the Fund is USD.

For Accumulating Shares, the income and earnings and gains of the Funds will be accumulated and reinvested.

Investors can buy and sell shares of the Fund on each business day. Business day means any day, excluding Christmas Eve (24 December) and New Year's Eve (31 December), on which the relevant recognised stock exchange on which the Shares are listed is open for normal business and at least 80% of the securities underlying the Index are available for trading, unless otherwise determined by the Directors and notified in advance to Shareholders.

Intended retail investor: Shares in the Sub-Fund may be subscribed to by both retail investors and institutional investors. Although investors can take their investment out at any time, the typical Investor would be one who is seeking capital appreciation over the long term. Such an investor is also one that is able to assess the merits and risks of an investment in the Shares of the relevant Class of the Fund. The investor understands that there is no capital guarantee or protection (100% of capital is at risk).

Depository: The Fund's assets are held through its Depository, which is J.P. Morgan SE - Dublin Branch.

Distribution type: The product is accumulation.

➤ What are the risks and what could I get in return?

Risk indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Example investment: USD 10,000		1 year	5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario	What you might get back after costs	USD 6,510	USD 4,070
	Average return each year	-34.88%	-16.44%
Unfavourable scenario ¹	What you might get back after costs	USD 7,360	USD 9,470
	Average return each year	-26.37%	-1.08%
Moderate scenario ²	What you might get back after costs	USD 11,040	USD 16,540

Favourable scenario ³	What you might get back after costs	USD 16,880	USD 23,550
	Average return each year	68.77%	18.69%

¹This type of scenario occurred for an investment from 12/2021 to 03/2024.

²This type of scenario occurred for an investment from 11/2018 to 11/2023.

³This type of scenario occurred for an investment from 10/2016 to 10/2021.

➤ What happens if Carne Global Fund Managers (Ireland) Limited is unable to pay out?

The assets and liabilities of the Fund are segregated from those of the PRIIP Manufacturer. The assets of the Fund are held in safekeeping by the Depositary. In the event of the insolvency of the PRIIP Manufacturer, the Fund's assets in the safekeeping of the Depositary will not be affected. In the event of the insolvency of the Depositary, you may suffer financial loss. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

➤ What are the costs?

Costs over time

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 is invested

Example Investment: USD 10,000	If you cash in after 1 year	If you cash in after 5 years
Total costs	USD 59	USD 446
Annual cost impact(*)	0.59%	0.59%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.17% before costs and 10.58% after costs.

Composition of costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

The table shows the impact on return per year		If you exit after 1 year	
One-off costs upon entry or exit	Entry costs	We do not charge an entry fee.	USD 0
	Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	USD 0
Ongoing costs taken each year	Management fees and other administrative or operating costs	0.49% of the value of your investment per year. This is an estimate based on actual costs over the last year.	USD 49
	Transaction costs	0.10% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	USD 10
Incidental costs taken under specific conditions	Performance fees and carried interest	There is no performance fee for this product.	USD 0

➤ How long should I hold it and can I take my money out early?

The recommended minimum holding period: 5 years.

The Fund is designed to be held over the long term and we recommend that you hold this investment for at least 5 years. You can request to take out some or all of your money at any time. You can typically request to buy or sell shares in the sub-fund on any business day (as set out in the Fund's prospectus). If you cash in at an early stage this will increase the risk of lower investment returns or a loss.

➤ How can I complain?

If you have any complaints about the product, the conduct of the manufacturer or the person advising on the product, complaints can be lodged via the following methods:

E-mail: complaints@carnegroup.com

Mail: 3rd Floor, 55 Charlemont Place, Dublin, D02 F985, Ireland.
